

### Digital Resources for Learning

FCS provides students with access to a variety of digital resources to support learning. All district provided resources can be accessed via Classlink at <https://launchpad.classlink.com/fcs>.

Students will need to enter their FCS username and passcode to login to ClassLink. The username is the student's ID number, and the passcode is selected by the student. Once in the system the student should click the desired resource.

Here is a list of the most notable apps for High School:
